Experience

Front-End Developer
Fiserv

2010 - Present, Chapin, SC

Tasked to develop fully functional responsive websites into a .net based CMS for end-user customization.

Improved the efficiency of the CMS by retooling many of the C# components into simpler forms. As a result, many of the websites now load 20% faster with improved custom options that can be controlled through CSS. The end product made it possible to create the very first W3C standard site in the company.

Developed a front-end framework for the flagship platform by CSS restructuring and the interjection of unique variables to create a fully working custom user interface within 40 hours.

Art Director - Senior Graphic Designer
PM Systems Corporation (Acquired by Fiserv 2016)

2007 - Present, Chapin, SC

Successfully manage and coordinate graphic design projects from a concept through completion. Work closely with clients to create a vision, conceive designs, and consistently meet deadlines and requirements. Conducted a lucrative marketing campaign, which led to a rapid increase in the amount of signed customers.

Graphic Designer
Stonewall Marketing Group

2004 - March 2007, Marietta, OH

Created professional, marketing campaigns for various companies in the financial, healthcare and tourism sectors. In addition, worked on-site with print vendors press runs and oversaw quality control. Collaborated closely with other designers to meet strict deadlines for clients including Peoples Bank, St. Josephs Hospital, Simonton Windows, Suddenlink Communications, and more.

Freelance Graphic Illustrator
Semantic Compaction Systems

2004 - October 2004, Pittsburgh, PA

Created over a hundred digital illustrations and icons for application programs.

Education

2001 - 2004

Bachelor of Science in Graphic Arts
The Art Institute of Pittsburgh
